

## Motivation Letter

My name is Aurellia Azh Nindy from International Program for Islamic Economics and Finance (IPIEF UMY). In this letter, I'm interested in stating my personal interest of applying for a student exchange program in Taiwan. I can say that I always had this passion and interest for the field of Economics and especially English. Knowing one of the University in Taiwan offers this program to go to the university to learn Economics and English was delighting information for me. Especially in Taiwan, I want to learn their culture and also language. So I hope this year is the year of fortune for me to be able to visit there and making an experience in the university.

learning Economics in the different Economy country is extremely important since people can understand each other without text and context or in another word language. I usually don't get many difficulties in learning language, I've tried to study English and it turned out pretty well. But, sometimes I was forgot a few words of English because I only speak English occasionally because just a few people can using English in Indonesia. Most of the people using Mandarin in Taiwan so this is the benefit for me because I should learn more about Mandarin and also improve my English

I want to learn a lot of the economy especially the economy and finance in Taiwan, how they can achieve economic prosperity and also I want to compare between the Indonesian economy and also Taiwan whether there are similarities and differences in the economic system of the two countries. I hope later I can use the knowledge that I get from Taiwan for economic prosperity in Indonesia

Finally, my future is something very precious for me and I will not let all my times to waste. While I am still alive and capable, I will give all my efforts to learn about new languages, cultures, tasting new foods, and also I will get to know new peoples and faces from all around the world.

Through the exchange's program offered at the university, I believe that I will be able to grow the skills and competencies required in this field. Thank you very much for your consideration.
