

Summer school is a very useful academic activity for me because besides studying, I can also meet and interact with friends from various campuses in Indonesia and Malaysia. This activity was very memorable for me because I was able to learn many new things about culture, language, and also science. During summer school, I attended many classes, seminars, case studies, as well as visits to various institutions and trips to various places. For example, I attended seminars to Sharia pawnshops and BTPN Syariah.

This summer school also provides an opportunity for me to practice more of my English skills. This language learning activity is very beneficial for me, because I can understand more terms and phrases in that language. In addition, I can also learn their different cultures, and this will certainly be very useful for me when I later work. Not about culture or language but ideas and thoughts in completing case studies. There are so many thoughts and ideas that I think are very good such as the use of electricity for islands or plosok in Indonesia, regarding halal certification which is to make certification for culinary that is not only ingredients but effects for the community.

Summer school semesters are not just about studying, but also about having fun and making connections with new people. During summer school I made great friendships with great people who shared my interests and goals. From them, I learned a lot about their view of the world, and their inspiring ideas. How they think about learning and the questions they give.

Moreover, what makes me proud, because during summer school, I also won 1st place in the International Essay Competition Category Halal Industry and Tourism. This competition is very useful for me, because I can apply what I learn about halal and tourism. This is the best opportunity for me to play with words and promote Indonesia as an amazing halal tourist destination. In the process of the race is also very short, moreover the busy schedule and we continue to do mobility during pickles, making it a little difficult for me to prepare for the race, only what is very rushed is the presentation maker that I show, only I just prepared it at night where in the morning I have to present, but my confidence with myself makes me very confident I can bring a good presentation. during the presentation, seeing other competition participants made me a little worried, especially I only discussed about "Halal Tourism In Adia Largest Muslim Country" regarding the inhibiting and supporting factors of Halal Tourism in Indonesia. But it turned out that during my percentage the judges really enjoyed the presentation, and received praise about my presentation. it was a very new and memorable thing for me where lecturers from UI, KTO, USIM, UNAIR gave praise.

At the end of summer school, I felt inspired and excited because I could interact and learn from my wonderful friends. I can also deepen my knowledge in tourism and halal industry, and take advantage of the opportunity to learn foreign languages to achieve my goals in the future. Summer school is the best opportunity for students to learn more, meet great people, and become more open and creative. I am very grateful for this opportunity which is very memorable for me. Summer school paved the way for many things in my future. Hopefully I can be better for a better future and continue to learn not only in school but also from anywhere including younger friends, peers, and older ones . For me, summer school is not only a place to learn but also a place where we want to process, make friends, and socialize about new things in a new place. Quite a short journey starting from July 17 , 2023 to July 26, 2023 for approximately 10 days together, the hardest thing was the separation of 30 students Being one for 10 days makes us know each other laughter, jokes are always there

Being with us is the best thing in summer school. I hope next year's summer school will be even better and will give more impression to all participants.
